

# Learning Platforms for Online Courses

---

During the class recording, only [Coursera](#) and [Udemy](#) were mentioned as online learning platforms.

However, there are many more platforms available for learning online. Here are some additional options:

- **edX**: Offers courses from top universities and institutions worldwide.
- **Khan Academy**: Provides free courses on a variety of subjects, including math, science, and programming.
- **Pluralsight**: Focuses on technology and creative skills, with courses for developers, IT professionals, and designers.
- **LinkedIn Learning**: Offers professional development courses in business, technology, and creative fields.
- **Codecademy**: Specializes in interactive coding lessons for beginners and advanced learners.
- **Skillshare**: Features creative and professional courses, including design, photography, and business.
- **FutureLearn**: Provides a wide range of courses from universities and cultural institutions.
- **Treehouse**: Focuses on web development, programming, and design.
- **MIT OpenCourseWare**: Free access to course materials from MIT.
- **The Odin Project**: A free, open-source curriculum for learning web development.

These platforms offer diverse learning opportunities for various interests and skill levels.
